

Career Opportunity

Position: Aircraft Maintenance Engineer
Positions available: 1
Location: Sioux Lookout, ON
Term: Permanent FT, starting immediately
Remuneration: Commensurate with experience
Benefits: Health, dental, prescription, optical and wellness benefits package

Job Description:

Reporting jointly to the Director of Maintenance, our AME's are responsible for all regular scheduled and non-scheduled maintenance on our fleet of Cessna and DeHavilland aircraft, as well as aircraft under our care from third parties. In addition to maintaining these aircraft, general shop tasks are required as would normally be expected in a small company setting.

Minimum Qualifications:

- Canadian citizen or landed immigrant, with the legal ability to work in Canada right now. (Sorry, we are unable to provide sponsorship to foreign visa applicants)
- Transport Canada AME-M1 license

Desired Qualifications:

- Experience in an air operation of similar size and scope to our own
- Experience on types C180, C206, DH2, DH3T, as well as floats and skis
- Experience with Continental IO-520, Pratt & Whitney R985 and PT6A-34 engines
- Demonstrated ability to work in a team environment or alone with direction but minimal supervision
- Transferable skills such as welding, general carpentry, sheet metal work, etc.
- Comfortable with a computerized maintenance tracking and control system
